

Monkey M: actual inputs to the torus fits

$m = 5$, $\tau = 17$ ms; shared training-fold PCA -> 3D (64.5% training variance retained)

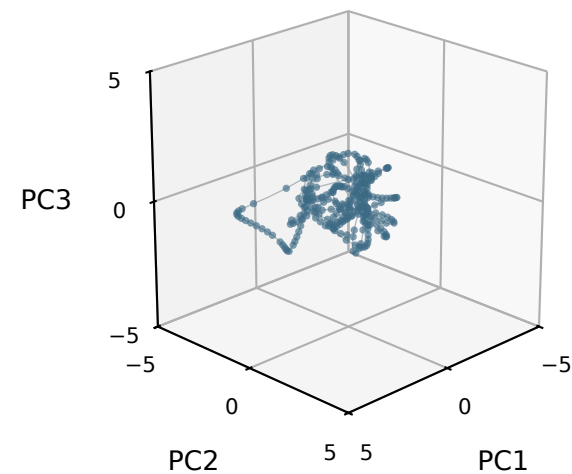

Direction 1 | trial 88

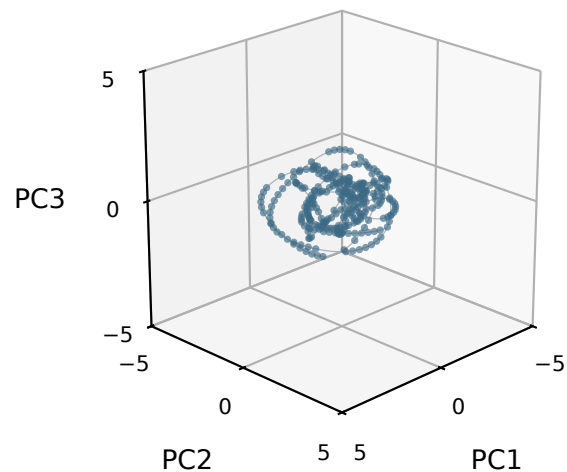

Direction 2 | trial 13

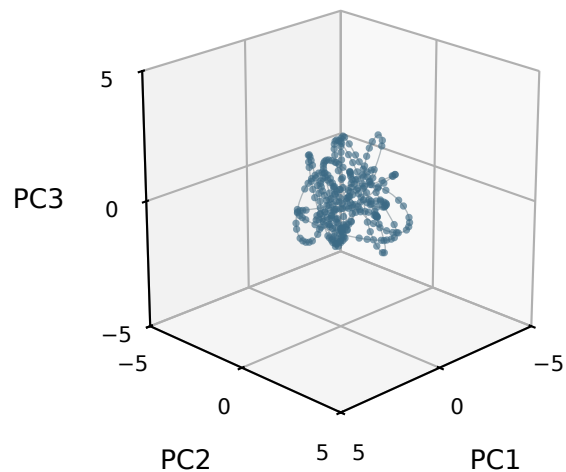

Direction 3 | trial 141

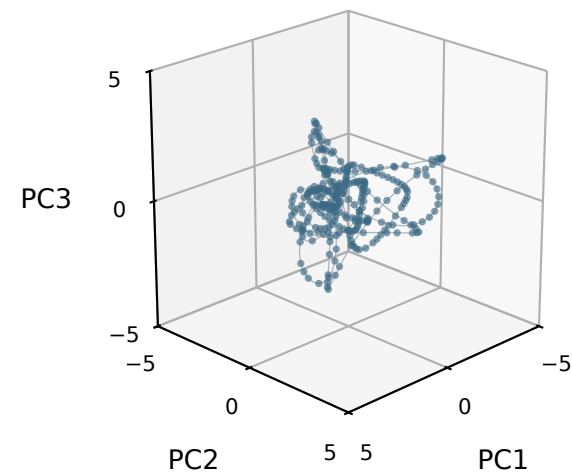

Direction 4 | trial 14

Direction 5 | trial 154

Direction 6 | trial 48

First held-out trial by original trial number for each direction; common axes within this recording.
Line: all embedded points. Dots: the 300 points used in the fit. No model refitting or surface overlay.
