

Monkey T: actual inputs to the torus fits

$m = 5$, $\tau = 14$ ms; shared training-fold PCA -> 3D (73.5% training variance retained)

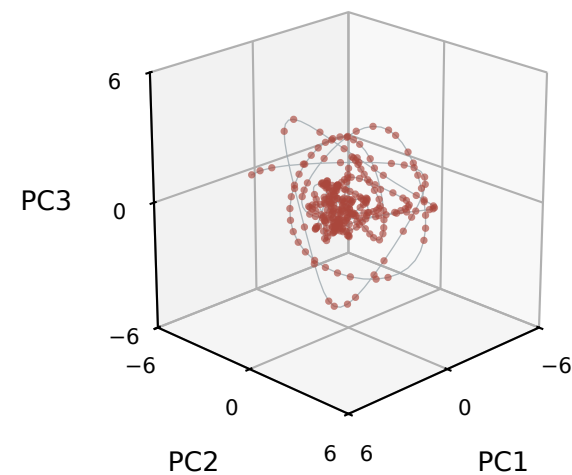

Direction 1 | trial 96

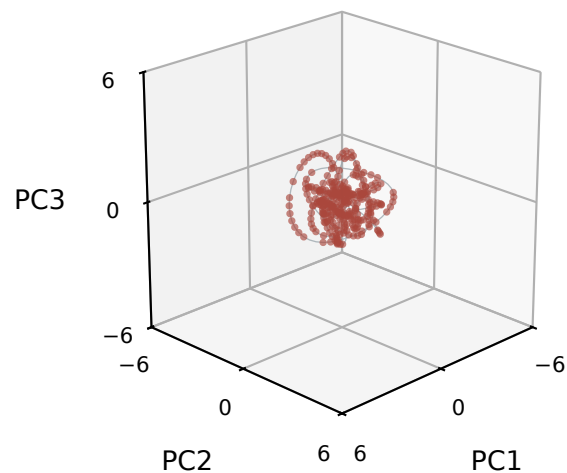

Direction 2 | trial 36

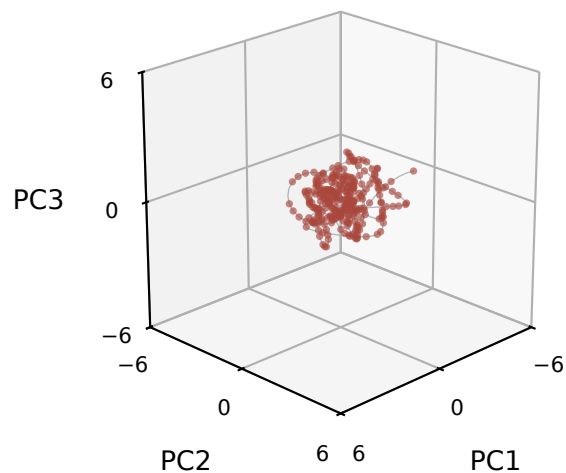

Direction 3 | trial 53

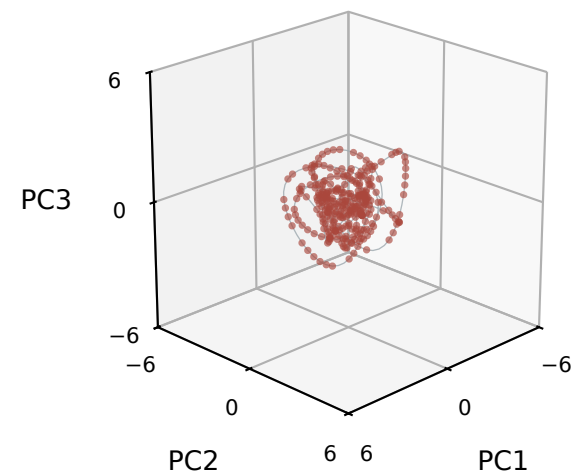

Direction 4 | trial 12

Direction 5 | trial 162

Direction 6 | trial 92

First held-out trial by original trial number for each direction; common axes within this recording.
Line: all embedded points. Dots: the 300 points used in the fit. No model refitting or surface overlay.
